Name:

Roll No.

1. In your 4A1 submitted code, how many classes were there? Name them.

   Two classes : Server, Client

2. In your 4A2 submitted code, how many classes were there? Name them.

   Three classes : Server, Client, Client Handler

   No marks for this portion. But (-1) for wrong answer

3. In 4A1, you will be calling the Socket function like " new Socket (???????)". (2)
   a. What are the parameters for Socket (·5)

      (Ipaddress, port)

   b. What are their (data) types? (·5)

      Ipaddress — String
      Port — Integer

   c. Did you give any hardcoded values to these parameters? Yes / No (·5)
   d. If Yes, what are those values? (·5)

      Port - 2000 (any value)
      Ipaddress - 127.0.0.1

4. Write the single code line where you created a thread in 4A2. You may complete the line given below, if it aligns with your code. Or, you may write the full line on your own. (2)

   Thread t = new __Client Handler (S, dis, dos)__

   Socket ↓   ↓   dataoutputstream.
           datainputstream
